Description

Explore three new personalized approaches to animal totemism unlike the usual totem dictionary full of stereotypical meanings. This comprehensive guide gives you a fresh perspective on the foundations, theories, and practices of totemism.

New Paths to Animal Totems presents three unique models of totem work, letting you experiment and blend them into your own spiritual practice. The Correspondence Model enables you to use directions, elements, and more to create your own totemic cosmology. In the Bioregional Model, you'll focus on the local physical and spiritual ecosystems of where you live. Totemism in the Archetypal Model represents aspects of your personality, psyche, and experience.

Each model provides new techniques for exploring totem work, whether you're a beginner or want to invigorate your existing practice. You'll also develop strong relationships and engage in meaningful conversations with your personal animal spirits. Use this essential guidebook to bring strength, wisdom, healing, and positive change to your life with hands-on rituals, meditations, and much more.
