Description

Many people over the years have requested to have Lisa hand-pick crystals and gemstones for them. Since, right now, no one can come in and chose their own - the crystals are getting lonely. You can now make a request for your own personal crystal kit and Lisa will hand-pick and write out the reasons why she chose the stones in your personal prescription. Please feel free to give a focus, for example: healing, prosperity, connection to spirit, etc. and she will work to choose crystals that align with your intention. Blessed Be.

Each set will vary in the amount of crystals recieved, as they will be chosen at equal or greater than the price you are paying. You will recieve your set of crystals, organza pouch & a hand written note about your set.
