Description

Charcoal Tablets

Perfect for burning loose incense or resins, they light quickly and are very easy to use.

Incense & Accessories: Quick Lighting Charcoal Tablets

Light a tablet on the edge, (a lighter or lit candle works best), and place it in a heat proof container, bowl side up. It's ready when it looks ash grey, much like the charcoal briquettes you use in a barbeque.

They burn best when used in a censor that has a screen, as the air can easily flow around the tablet. We carry a number of different censors, they are all solid brass and some have wood handles. Scroll down and check out the related products below.

For best results, store in an air-tight container after opening.

Roll of 10 tablets
