Description

A culmination of research and creativity, Tarot D focuses on the reflective mapping of a personal journey into the universal language of symbols. It transforms into a fully illustrated epic poem or story as you experience "Being, Doing, Thinking, Feeling, Pause, and Changing" within iconic imagery. The path each of us travels is drastically different and yet undeniably similar. How we arrive at the mountaintop—and adventures along the way—is the substance of our individual, legendary tales found herein. Entering into the traditions and rituals of storytelling, this new system can also be used as a tool for meditation and is suitable for both experienced and novice readers alike. Welcome to your story!
