Description

Use this deck as a traditional Tarot Majors-only system or delve into a technique using protagonists and antagonists pitted against each other until they reach unification, much like Shakespearean therapy where we explore problems via another lens. Learn to visualize and build your own reality by discovering answers to your deepest questions, bringing to light powerful truths and seeing the radiance of the self through a poetic treatment of the Majors. Created through decades of research into Alchemy and different divination modalities, this deck offers a fresh new perspective on using the cards to unveil what has been hidden.
