Description
Witch Balls - Fabulous & Intriguing Creations, hand blown in England by craftsmen. Each one a totally unique work of art.

Witch balls are free blown glass spheres, with 3 or more strands inside for collecting evil spirits and the like.

Each one is unique with color, strands, bubbles and even varying size. The small size is a little larger than a baseball.

Witch balls were very popular in 18th century England, but their actual origin is thought to be much older.

For well over 300 years, hollow glass spheres have been hung in windows to ward off evil spells, spirits and ill-fortune.

Hanging these decorative balls in the window is thought to tantilize and trap evil spirits which may be threatening a home. The negative energy becomes trapped and absorbed in the web-like strands of glass inside the ball.

Our stunningly beautiful witch balls come in a wide variety of color combinations - if you have a preference for a particular color, please indicate this in the notes section of your order, and we'll do our best to select one that's just right. However, please understand as these balls are completely unique, we can make no guarantees... although we will certainly try.
